

Time to do what you do best. Snip, cut and shave away all of your clients excess hair while keeping your cool and collective calm. Flex off the finished look and get ready, we're moving onwards to step number two.

Step One (+)

01

Cut The Hair

Step Two (+)

02

Sweep It Up

Get a handy broom ready. It's time to mosey on over and move that dead hair away from the chair and into a dustpan & brush. Take gentle strokes and aim to collect it all into one circle for maximum effectiveness.

04

Get It Collected

Step Four (+)

03

Put It In A Bag

Step Three (+)

After all the hairs collected, be sure to place it all nice and tidy into a black bin bag. Hair should go right into the general waste bin, so get the right bags for the right sized bin!

You'll soon start to notice the bin getting more and more full. As a business owner, you will need to get a reputable and reliable waste management provider to collect that rubbish for you!
