

# COURSE GUIDE

## WORKPLACE SAFETY: LEGIONELLA TRAINING VIDEO

## Why do I need this course?

Legionnaires' (a form of pneumonia) is a potentially deadly disease which is commonly caused by the distribution of water droplets through air conditioning units infected with the bacterium known to us as Legionella. This course is vital to identify the risks and learn methods for prevention and control including knowledge of symptoms as well as practical steps to take against it.

## What's covered in each course chapter?

There are three chapters to this course which will each cover the following:

### 1. Legionnaire's Disease

- Legionella
- Legionnaire's disease
- Areas of risk

### 2. Assessing Risk

- Requirements for a risk assessment
- Identifying risks
- Record keeping

### 3. Prevention & Control

- Course of action
- Preventative measures

## What are the benefits of the course?

The primary benefit of this course is to offer you the vital information required to prevent the cause of Legionella spread which, in some cases, could result in saving a life.

## How will the course work?

This interactive course will be delivered online to users who can study from their own computers or portable device from anywhere they choose.

The course is delivered in video format, making use of modern illustrational graphics to ensure it remains engaging throughout.

This professionally produced video is entertaining and informative, and will offer the necessary information required to complete a risk checklist and self-test following the video.

Upon successful completion of the course, trainees will receive a certificate which can be downloaded at no extra charge.

## Course Length:

10-15 minutes

## Price:

£17.50
