

SECURE MAT SUPER TOUGH VERSION

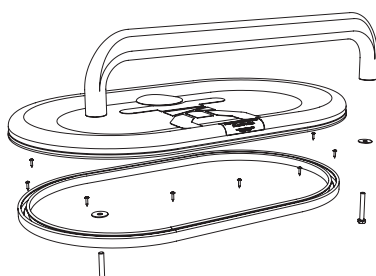

Although many retailers, shopping centres and public transport systems have provided excellent provision of space in the form of dedicated parent facilities, the actual changing mat has remained the same; these mats are of a light domestic duty and generally unsuitable for commercial use.

cartridge in the form of a 'Super Tough' one piece moulding. Designed to be fully interchangeable with the existing SM (Secure Mat) System this version offers the unique advantages of a very durable, flexible surface with an integral biocide, however surface printing of company logos etc. cannot be offered.

Designed and manufactured in the UK
All Baby Point products are tested to EN: 12221-1: 2008
Designed and manufactured to ISO 9001

Architects Note:

The new one piece moulded changing mat cartridge is fully interchangeable with the existing SM/1 (Secure Mat) components.

It is moulded with an integrally bonded surface material called 'Superskin' which is a PU/Latex polymer with the UV stabilizer and anti microbial surface protector included (SteriTouch). This combination of materials achieves a 100% waterproof surface membrane integrally moulded with a medium density PU foam core to give a prolonged service life coupled with excellent hygiene performance.

The product has been independently tested for compliance to EN 12221-1:2008, along with a fire rating for cigarette and naked flame to BS EN 12952:2011 parts 1&2 by Bureau Veritas.

Features include:

Model SM/ST-1

The 'Super Tough' cartridge includes:

An integrally moulded PVC extrusion locking the cartridge into the standard SM (Secure Mat) System retaining track TR/1

A safety Warning label to the requirements of EN 12221-1:2008

The proprietary biocide 'SteriTouch' included in the 'Superskin' surface

Available as standard in light grey or beige with a variety of safety rail colour options. The baby change pictogram in relief on the surface of the moulding.

Designed for use by either right or left handed parents.

Stock colour combinations include:

Grey/Yellow safety rail

Beige/Dark Grey safety rail
