**[2]** Only stainless steel models (CP0016HCS & CP0016VCS)

## Certifications

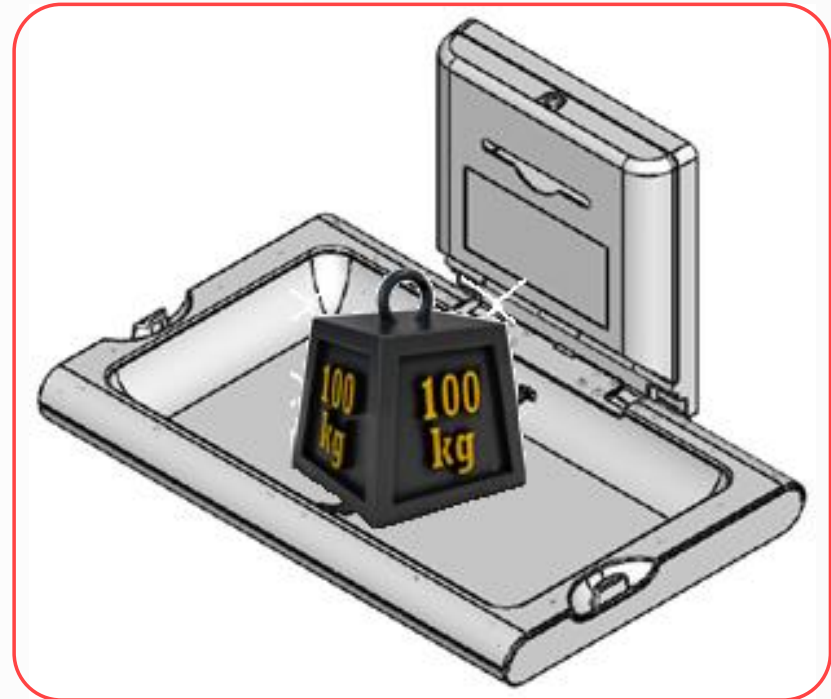

# Main features

## Safety

- Robust. Supports loads up to 100 Kg<sup>(1)</sup>. In our own laboratories we have loaded the baby changing station over 100 kg without damaging the product.
- Rigid and very firm. No deflection.
- Nylon protection straps with quick fixing fastener.
- Certified according to the European safety standards EN12221-1 and EN 12221-2 and the American standard ASTM F2285-04.

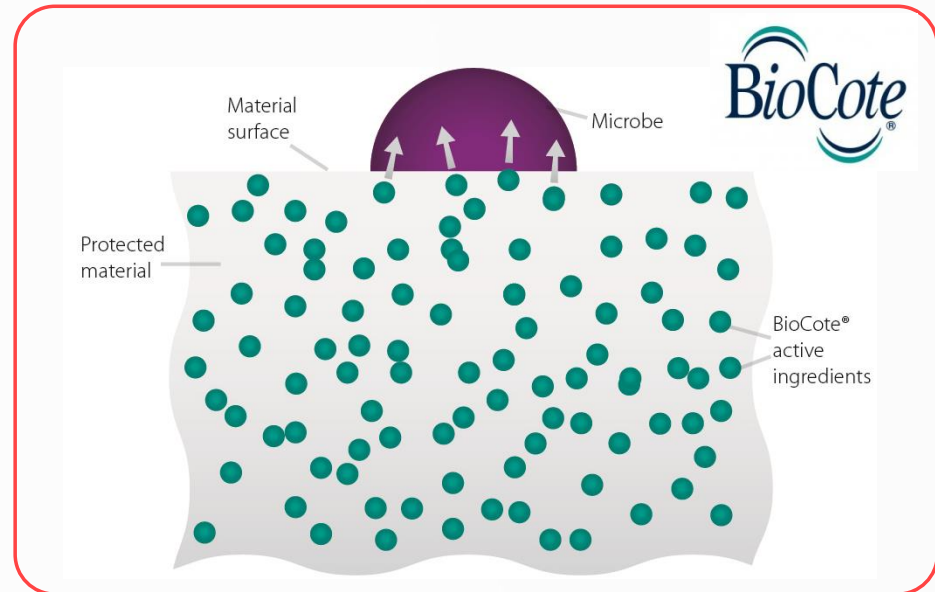

*(1) As long as the suitable wall-mounting elements are used and it is properly installed according to the Mediclinics' instructions*

# Main features

## Hygiene

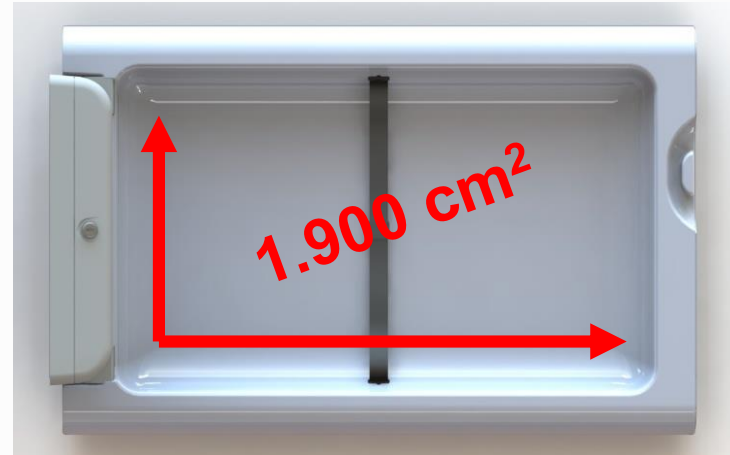

- Biocote® antimicrobial additive embedded onto its surface, inhibiting the spread of viruses and bacteria and reducing the risk of cross-contamination.
- Easy to clean with its smooth-textured surface, seamless, with rounded corners.
- Bed liner dispenser with capacity of approximately 80 units.

# Main features

## Comfort

- Spacious. 1,900 cm<sup>2</sup> to get your baby comfortably changed.
- Seamless, harmless to the baby.
- Comes with 1 hook (vertical model) or 2 (horizontal model) to be able to hang diapers handbags or other personal belongings.

# Main features

## Durability

- Concealed opening mechanism consisting of 2 steel hinges and a pneumatic cylinder (shock absorber) that guarantees a smooth opening and great durability.
- Wall easy-mounting chassis made of steel and with a cataphoresis treatment that avoids rusting. The corresponding mounting hardware is included.
- Liner dispenser with lock for discouraging potential vandalism.

# Main features

## Design

- Ergonomic. Babymedi® can be opened and closed with a single hand for a hassle free experience.
- Modern, smart, and comfortable curves for pleasant use.
- AISI 304 Stainless steel finishing for perfect integration in any bathroom spaces.
